Description of Project:

A Shoreline Variance is required for utility improvements located within the 200 foot Shoreline Conservancy buffer for the Puyallup and White Rivers, which are designated as Shorelines of Statewide Significance per WAC 173-18. See the attached page for further details.

Supporting Materials Required:

Office Applicant - (please check off all applicable "applicant" boxes)

- | | | |
|--------------------------|---|------------------------------|
| <input type="checkbox"/> | This Application Form and Checklist | |
| <input type="checkbox"/> | Cover Letter
Address the criteria listed in SMC 16.28 or 16.30 as applicable. | 2 - Copies |
| <input type="checkbox"/> | Site Plan (1:40 scale - No site plan required for interior tenant improvements)
Vicinity map
Project zoning
Property line dimensions
All public and private roads, driveway access and all easements (specify type on or adjacent to the site)
Existing and proposed fire hydrant locations and all water main sizes; if no hydrants on site, distance to the nearest hydrants
All major man-made features; drainage ditches, railroad tracks, etc.
Proposed building locations; setbacks from property lines and distance between structures proposed and Existing.
Building dimensions including height and number of stories
Paved and parking areas including parking locations, maneuvering areas, loading areas, handicapped stalls, walkways, etc
Type of construction
Proposed uses
Proposed landscaped areas
Outside storage areas, including type of surface and product to be stored
Proposed trash dumpster location
Proposed on-site utilities including sanitary sewer, storm drainage, water services (both domestic fire irrigation)
Type of detention/retention system and treatment for stormwater
Environmental constraints identified and delineated
Is the project in a flood zone? What is the base flood elevation? | 1 - Copy (8.5" x 11") |

Supporting Materials Required:

Office Applicant - (please check off all applicable "Applicant" boxes)

<input type="checkbox"/>	Shoreline Diagrams	5 - Copies (11" x 17")
<input type="checkbox"/>	Mailing list of all property owners within 500 ft, 1000 if project is in M1 zone	2 - Sets of labels
<input type="checkbox"/>	Landscape Plan	5 - Copies (11" X 17")
<input type="checkbox"/>	Title Report	2 - Copies (8.5" x 11")
<input type="checkbox"/>	Legal Description	2 - Copies (8.5" x 11")
<input type="checkbox"/>	SEPA Checklist (Consult staff concerning fee)	5 - Copies (8.5" x 11")
<input type="checkbox"/>	Elevations (Design Review Required- please consult Planning staff)	5 - Copies (11" x 17")
<input type="checkbox"/>	Permit fee (Please consult the Permit Specialist for the fee amount)	

NOTES:

The Sumner Wastewater Treatment Plant (WWTP) serves the Cities of Sumner and Bonney Lake as well as a portion of unincorporated Pierce County. The WWTP is located at the confluence of the White and Puyallup rivers and has undergone several upgrades since its construction in 1955. The majority of the facility is located within 200 feet of floodway and the Shoreline Conservancy buffer. The WWTP is currently managed under the City of Sumner Final Comprehensive Facility Plan (Kennedy Jenks, Jan 1999) and the City of Sumner Final Comprehensive Facility Plan Amendment No. 1 (Gray & Osborne, Inc., February 2000) as well as subject to the facility NPDES permit. The proposed Phase 2 Expansion is the second and final expansion planned under the Final Facility Management Plan (1999) and with the specific recommendations located in the Facility Plan Addendum No. 2 currently under review. The facility upgrades and process improvements were accommodated for during the Phase 1 Expansion.

The National Pollutant Discharge Elimination Permit (NPDES) for the Sumner Wastewater Treatment Plant requires the City to initiate planning for facility expansion when 85% of plant capacity is exceeded for three consecutive months, which occurred during the period from November 2009 through January 2010. During the period since the last upgrade, Total Suspended Solids and BOD loadings have increased more rapidly than anticipated in the 1999 Facilities Plan. Consequently, the City of Sumner is proposing to expand the WWTP to accommodate the increased flows and loadings associated with the revised flow and load trends and population growth and expansion of its service area.

The City is currently reviewing two design layouts addressing increased BOD and TSS loadings with budgetary considerations determining the ultimate design selection. Alternative B is the preferred design. The planned expansion will increase the capacity of the existing WWTP to a maximum month design flow of either 5.41 MGD (Phase 2A) or 6.10 MGD (Phase 2B). The components for both design layouts are similar and most elements are accommodated within the existing facility. Many project elements include modification of existing structures, usually internally, to upgrade facility operations and as required as part of compliance with the NPDES permit through the planning period (Phase 2A of 2034 or Phase 2B of 2043). Project elements not required for NPDES compliance are identified in the attached cover letter.

I HEREBY CERTIFY THAT I HAVE READ AND EXAMINED THIS APPLICATION AND KNOW THE SAME TO BE TRUE AND CORRECT. ALL PROVISIONS OF LAWS AND ORDINANCES GOVERNING THIS TYPE OF WORK WILL BE COMPLIED WITH WHETHER SPECIFIED HEREIN OR NOT.

****BY LEAVING THE CONTRACTOR INFORMATION SECTION BLANK, I HEREBY CERTIFY FURTHER THAT CONTRACTORS (GENERAL OR SUBCONTRACTORS) WILL NOT BE HIRED TO PERFORM ANY WORK IN ASSOCIATION WITH THIS PERMIT. (building permits only)**
